

MESSAGE FROM THE PRESIDENT

BLACK HISTORY MONTH 2017

THE SPIRIT OF SERVICE

AFRICAN-AMERICANS IN SCIENCE, TECHNOLOGY, ENGINEERING & MATHEMATICS

Space exploration.
Lifesaving medical breakthroughs.
Innovations that shape our daily lives.

NTEU is honored to celebrate America's extraordinary minds during February's Black History Month. Because of the efforts and perseverance of the many scientists, mathematicians and engineers who broke barriers in their fields, our world has been forever changed.

We're honoring female scientists whose work in the medical field revolutionized vision. Astronauts whose inventions allowed NASA and the world to see parts of space we never thought possible. Inventors and city planners, using their math prowess to create our nation's capital. The legacy of these great minds is all around us and all across the nation.

This Black History Month, NTEU celebrates the known and the unknown, fighting to make our world a better place. We encourage you to join us, discover more about the lives and contributions of these African-Americans to our nation, our culture and our lives. You can start your journey at NTEU's Black History Month website, at www.nteu.org/BlackHistory.
